Summary

Technical professional pursuing a Sales Engineering or similar role, combining hands-on experience in pre-sales quoting, technical discovery, and solution validation with a Computer Science background in machine learning, Linux systems, and software development. Skilled at translating customer requirements into accurate technical solutions and communicating complex concepts to both technical and non-technical audiences. Brings working knowledge of cybersecurity principles and LLMs, along with a commitment to continuous learning.

Skills

Sales Engineering: Technical Discovery, Requirements Gathering, Solution Design, Solution Validation, Technical Scoping, Pre-Sales Support, Quoting, Proposal Development, Customer Engagement
Technical Sales: Hardware & Software Solutions, Licensing, Managed Services, Product Compatibility, System Requirements, Vendor Specifications, BOMs, SOWs, IPRs
Programming & Technology: Python, C++, Java, Fortran, Git, Linux, Ubuntu, Machine Learning, Artificial Neural Networks, LLMs, GPU Computing, RAID, Storage, ConnectWise Manage, ConnectWise Quosal (CPQ)

Certifications

CompTIA AI Agent Essentials August 2026
CompTIA A+ Cyber October 2026
VMware Cloud Foundation - Pre-Sales, Proven Professional – Broadcom October 2026
VMware Cloud Foundation - Pre-Sales, Certified Expert – Broadcom October 2026
In Progress: CompTIA AutoOps+, Network+, and Project+ (CertMaster)

Experience

Inside Support Representative April 2026 – Present
Ardham Technologies Inc. *Albuquerque, New Mexico*

- Partner with Sales, Engineering, and Procurement to conduct technical discovery, gather requirements, scope solutions, and develop and validate 200+ hardware, software, licensing, and managed-service quotes per month.
- Evaluate product compatibility, system requirements, and vendor documentation to ensure solution accuracy and reduce quote revision cycles.
- Review SOWs, BOMs, and IPRs, and participate in technical scoping calls prior to quote development; engage customers, partners, and internal stakeholders to support pre-sales alignment.

Undergraduate Research Student Nov. 2023 – Dec. 2025
Mercer University School of Engineering *Macon, Georgia*

- Designed and delivered a machine learning curriculum through the NASA-funded ML-Bots initiative, translating complex technical concepts for non-technical audiences.
- Administered an Ubuntu-based machine learning supercomputer, including GPU installation, RAID configuration, storage optimization, and hardware/software maintenance.
- Researched LLM fine-tuning techniques and prototyped a medical chatbot using clinical datasets.

Fabrication Lab Teaching Assistant Aug. 2024 – May 2025
Mercer University School of Engineering *Macon, Georgia*

- Trained students on 3D printing and laser cutting equipment and led technical lab tours for prospective students and visitors.

Projects

ML-Bots | *Python, Google Colab* – Developed a NASA-funded machine learning curriculum for educators across the Southeast.
Multi-Language Poker Game | *C++, Go, Rust, Fortran, Git* – Built a Five Card Stud Poker game in four languages using object-oriented principles.

Education

Mercer University Macon, GA
B.S. Computer Science, Minor in Mathematics, Magna Cum Laude *Aug. 2022 – Dec. 2025*
